

ARTICLE 11. STORMWATER MANAGEMENT

11.1 STORMWATER MANAGEMENT PLAN

11.2 DRAINAGE AND STORMWATER MANAGEMENT

11.1 STORMWATER MANAGEMENT PLAN

A stormwater management plan must be submitted for new development when required by the City Engineer. In the case of sites over one acre, where the Louisiana Department of Environmental Quality requires submittal of a stormwater management plan, a copy of such plan may be substituted in place of the plan required by this section.

11.2 DRAINAGE AND STORMWATER MANAGEMENT

Within the Caddo Parish, drainage ditches, storm sewers, storm drainage courses, and stormwater detention facilities must comply with the design standards established per Chapter 46 of the Caddo Parish Code of Ordinances.
